

# XactAnalysis QR: Elevate Your Quality Assurance in Property Claims

## A complex challenge

In today's fast-paced claims environment, maintaining consistent quality while reducing cycle times is more challenging than ever. It requires a solution that streamlines quality reviews and delivers actionable insights without disrupting your existing claims process.

## Transform your quality review process with XactAnalysis QR

XactAnalysis® QR is an advanced online module designed specifically for reinspection workflows. It allows your reinspection teams to work efficiently without interrupting standard claims and inspection processes, while maintaining a separate workflow for quality assurance.

### Real-time quality management

- Automatically capture and review uploaded estimates from any claims program
- Access everything needed for desk audits: digital images, sketched floor plans, and detailed estimate reports
- Track the progress of any file and manage the approval process
- Compare original and corrected estimates in real time

### Smart automated workflows

- Set up rules to randomly capture estimates based on your criteria (e.g., one of every five estimates)
- Automatically flag every estimate that exceeds specified thresholds
- Route reviews to appropriate team members based on expertise
- Enable multiple reviewers to assess the same claim for calibration

### Proactive error prevention

- Catch measurement inaccuracies before they impact settlements
- Ensure comprehensive scope including code-required upgrades
- Prevent misapplication of line-item codes and labor minimums
- Improve documentation quality across photos, sketches, and notes
- Optimize utilization of Xactimate® Sketch® and ClaimXperience®

## Drive continuous improvement

XactAnalysis QR can transform your quality assurance process by delivering:

### Enhanced accuracy

- Real-time validation of estimate components
- Automated flagging of potential issues
- Standardized review processes across teams

### Increased efficiency

- Streamlined reinspection workflows
- Reduced manual review time
- Faster completion of quality audits

### Better insights

- Detailed performance metrics
- Trend analysis and reporting
- Training opportunity identification

## Customize to your needs

XactAnalysis QR adapts to your unique requirements:

- Configure automated triggers for claim reviews
- Set up rules per date range, geographical area, or loss type
- Maintain separate quality review data from other programs
- Integrate seamlessly with your existing Verisk solutions, including Xactimate and ClaimXperience

## Take the next step

Ready to elevate your claims quality assurance?
