

XactInsights Professional

Stop drowning in data.
Start driving results.

The challenge

Insurance claims data is more complex than ever. Your team needs timely, clear insights to make critical decisions—but sifting through massive data volumes can slow you down when speed matters most.

The solution

XactInsights Professional turns data into action with custom dashboards, built for your specific needs in Microsoft Power BI. Whether you're using industry data, internal records, or trusted third-party sources, our solution helps make it simple to visualize key insights and act with confidence.

Why industry leaders choose custom dashboards

Tailored insights for your role

Every team needs precise, actionable insights. Configure dashboards for your unique organizational needs and stay one step ahead with focused views.

Boosted operational performance

Eliminate manual reporting. Empower your team to access, filter, and analyze data instantly—freeing your experts to focus on serving policyholders.

Accelerated decision making

Access your most relevant data in one centralized view. Make informed decisions quickly during daily operations or catastrophic events.

Enhanced collaboration

Share dashboards across teams and leadership. Foster transparency and alignment when everyone works from the same up-to-date information.

Turn complex data into clear action
