Xactimate Time & Materials

Streamline job cost tracking for large-scale restoration work

Confidently take on complex projects

Time & Materials streamlines the tracking and reporting of time and material expenses enabling construction and restoration professionals to save time and reduce overhead costs.

With Time & Materials, you can:

Reduce cycle times

Online and mobile options enable you to capture and record data directly in the field and automatically sync with Xactimate.

Enhance billing accuracy

Having updated price lists and real-time tracking of labor, materials, equipment, and subcontractor costs in a single digital platform reduces human error and leads to more accurate billing.

Use anywhere

Users can track billable job costs in Time & Materials on any device with access to internet and your data is automatically backed up in Xactimate.

Little to no training required

Integration and adoption are quick and easy because Time & Materials is built directly into Xactimate.

Easy, instant access by insurance carrier clients

Write Time & Material estimates in Xactimate formatted for insurance carrier acceptance.

Achieve greater transparency

Customize reports in Time & Materials to fit your customers' needs and offer detailed documentation to support your billing.
